Version updates include new features such as Inner Glow, Inner Shadow, and Emboss effects for objects, as well as Outline, Background, Fill, Color, and Masks options for Image and Sticker Objects. The Editor tab now includes the 'Merge Selected Layers' option and a 'Font Favorites' section. Additionally, 32 Camouflage Patterns and 180 Flower Stickers have been added to the platform. Multiple object editing has been improved, allowing for more precise control over effects like Long Shadow, Overlays & Masks, and Shadows/Highlights Filter. New features also include the ability to copy and paste multiple objects, add empty cells to documents, and flip text horizontally or vertically. Improved Color Balance, Point Color, Replace Color, Cut Out, and Enhanced RAW support in the latest version. This update also includes a revamped user interface and resolves permission issues on macOS Mojave 10.14. The new version features advanced filters such as Spot Light, Whites, Blacks, Colorize, and Remove Color Cast, allowing for greater creative control. Additionally, the update adds HDR, Whites, Blacks filters to the Batch tab, along with Focus Stacking and Merge to HDR in the Viewer tab. Other key enhancements include improved Lens Profile Correction, Fisheye, HDR, Auto Contrast, and Dehaze filters, as well as enhanced Mask and Slideshow features. The update also supports borderless printing on macOS and resolves several bugs. The previous version, 2.8.2 (May 31, 2018), added Color, Curve, Blur, Light filters to the Batch tab, along with advanced image effects like Figures, Blurred Textures, and Light Leaks. This update also included a Jpeg Quality Preview Window, Show GPS Badge option in the Viewer tab, Outline Only option for text objects, and support for the Photos app "Edit With" menu on macOS 10.13+. Additionally, it added Share Extensions on macOS and system "Share" menu on Windows 10 version 1803+. The new filters include Lens Profile Correction, Margin/Round Corners, Offset, and Border Line, providing even more flexibility when editing images. The update also includes a space bar shortcut for comparing images and a cmd+wheel shortcut for zooming in. Other notable improvements include an enhanced Spot Healing Brush, Noise Reduction, Magic Color, and Jpeg Preview, as well as the ability to create Text Templates and Object Layers. * Enhancements to gesture recognition in Loupe View and Full Screen modes * Upgraded support for RAW images and Sandbox mode * Improved user interface with additional filters and tools * Version 2.5 (December 17, 2016) * Introduced "Save Project" feature in the Editor tab for future editing * Added "Load/Save Settings" menu to Batch tab * Implemented Loupe View and metadata fields for text objects * Enhanced RAW image support and UI improvements * Version 2.4.1 (July 16, 2016) * Introduced new filters: HDR, Dehaze, Reduce Noise, Hue/Saturation, and more * Added tools: Bloom, Mixer Brush, Spot Healing Brush, and Liquify * Supported Local Adjustments (Mask) and RAW images * Version 2.4 (May 20, 2016) * Introduced new filters: HDR, Dehaze, Reduce Noise, Hue/Saturation, and more * Added tools: Bloom, Mixer Brush, Spot Healing Brush, and Liquify * Supported Local Adjustments (Mask) and RAW images * Version 2.3 (October 28, 2015) * Redesigned Editor UI with new Quick Menu * Introduced filters: Film Grain, Channel Mixer, Tint, Threshold, Emboss, and more * Added objects: Magnifier, Filter object (Mosaic, Jitter, Blur, Crystalize, and Newsprint) * New brushes: Dodge, Burn, and Sharpen * Version 2.2 (April 28, 2015) * Simplified UI/UX with animated GIF support * Introduced vibrance filter and circular crop option in Editor tab * Added watermark function to Create GIF tab * Version 2.1 (January 8, 2015) * Added "Print" tab with improved Bloom filter and Rename tool * Introduced 80 more collage templates, 25 light leaks, and 40 frames * Version 2.0 (December 9, 2014) * Initial release of the software
