Checkers help Checkers is a two-player game, where one player is assigned white checkers and the other red. Each player has 12 checkers to start the game. Aim of the game The object of the game is to capture the other player's checkers or make them impossible to move Start of the game The game is started in the position shown below on a checkers board consisting of 64 squares in an 8x8 grid. The red player moves first. Then each player takes a single turn. In fact, a player must move in turn. In other words a move cannot be skipped. Playing the game A move consists of placing one checker on a different square. Capture Captures or 'jumps' are mandatory. If a square diagonally in front of a man is occupied by an opponent's piece, and if the square beyond that piece in the same direction is empty, the man may 'jump' over the opponent's piece and land on the empty square. The opponent's piece is captured and removed from the board. Multiple jumps If, after making a capture, a piece is in a position to make another capture (either along the same diagonal or a different one) it must do so, all as part of the same turn. Capturing two opposing pieces in a turn is called a double jump, capturing three pieces in a turn is a triple jump , and so on. If you have a choice of jumps, you may choose among them, regardless of whether they are multiple or not. The Kings When a single piece reaches the last rank of the board by reason of a move, or as the completion of a 'jump', it becomes a king; and that completes the move, or 'jump'. A King can move in any direction and 'jump' in any direction one or more pieces, as the limits of the board permit. The King can only jump diagonally over one adjacent piece at a time, in any of the four diagonal directions. Multiple jumps apply to kings as well. Time control A clock is used to limit the length of a game. These clocks count the time that each player separately takes for making his own moves. The rules are very simple, if you run out of time, you lose the game, and thus must budget your time. End of the game Winning The game is won by the player who has captured all of the opponent's pieces whose opponent declares he resigns. Losing The game is lost by a player who cannot make any legal move on the board. Draw The game is drawn when there is no capture or promotion to king for 40 pairs of consecutive moves. The game is drawn automatically if there is no winner after 200 moves (100 each). How to play Checkers? The checkers can be moved by dragging them with the mouse on their initial square and dropping them to their destination field. For special moves/jumps the same applies (see below). Capturing is indicated by moving the checker to its destination field through the captured checker. >> > _ well there is no way to control the program players> if banned they will just inake new names and use> program again and the cycle of banning again and> again is pointless. also some players are mistaken of> using a program so it wouldn't be fair banning> someone who really inst using a program; that is true i have being called program bye players who hate losing. its sad :((Its your spelling, punctuation, and grammar that are sad. Maybe you should spend less time playing checkers and take an English class.THE CHEATING IS VERY BAD AND I BELIVE THAT, IT CAN BE STOPED. PEOPLE ARE CHEETING THE TIME BY BEING ABLE TO MOVE A CHECKER IN SLOE MOTION AND IT DOES NOT COST THE TIME. YOU CAN STOP THAT IF YOU WANT. I AM SURE THAT THE SPONSORS DO NOT WANT TO BE ASSOCIATED WITH ANY FORAM OF CHEATING. RESPECTIFULY. QUINNPeople who use this sort of Device do not use naturalAbility to think Logical about the game.This sort of Program Should be Banned.IAN Scotland.FlyOrDie Rules: Programs may be used so long as your opponent is made aware of before a match and accepts. It is common courtesy to let another player know before you play. Failing to do so will result in your account being banned.Obviously FlyOrDie isn't big enough to have a lot of Moderators to do this. Just report the player, a warning appears beside their name until they are monitored, and then proper action will be notified. (Might take up to a year.)Of course, looking at a lot of people's profiles who get reported, they win a lot sure but they usually lose some too. Just quit being a sore loser when you get beat, checkers is a strategy game but it isn't hard to outplay your opponent. Everyone makes a mistake in their game occasionally, even the best. Just remember when you report someone it takes the fun away from them when no one will play them because you are a sore loser.Checkers Game 8x8 has only 7 oppen Move and 147 games is very easy . Much player have progam it is true , if you can win without program vs program player . Play pls diagonal long line and make 3 piece jumps (sometime is 2 piece jumps good too)t-rex you not know how playing checkers 6 years only contra program u winning Joker kid not 6 years . i played 7 years here 2003 (Chess)was me first game here IN FLYORDIE .ask mods i have never a !Its a game were's the satisfaction in winning from using a program, there isn't any.If your opponent looses then the program has won, you haven't even played the game HA it's human nature to cheat sometimesPeople should just win or tie with these programs. It was proven by CHINOOK that the game is a tie if you play the best moves. Those people who use programs probably have an inferiority complex.Sometimes I say: lets have a good time at flyordie. Then i start playing... oh no! programme player...lets play another player...oh no! programmer...and then that moments after work that i want to have fun become upset and sad.Each time there are more and more programs in flyordie. What a pity!that isn't a program, its just a weird dude talking about a mid-game defensive hold to at least draw with his opponent.> I used to be a paid subscriber to FlyorDie, even then> players were allowed to use cheat programs. Why are> there programs allowed? I don't really expect a> response from this, or at least one that makes sense,> but we'll see!Champion DK you can win vs a program player see in checkers book game no.61 or no.81joker kid how do u get the program so you can win so much.so please tell me so i can STOP LOSING people who wants to cheat me can cheat. im to good but ill still beat them only if there a little smart for me so ill say ill beat half of yous who used of playing the flyordie games you wont beat the cheaky. (monkey)Sometimes appears a mark with my name presuming I use program. I can't understand why it happens, but certainly that upsets me. I appreciate a better analysis before impeach somebody.There are a lot of people using programs but honestly. 90% of you crying program don't know because your not good enough to understand. I have played online checkers for 12 years and real offline tournament play since 2007. I am a master in real life and hold multiple titles. many of you cry prog about me a lot but the better players like joker kid and dj know im real. Many of you that do not program turn your programs on as soon as someone with 480+ wants to play with you... your just stooping to their level.Start playing at bullet room, people still program but they run out of time!!! much more fair for us real players :)Estava jogando damas e resolvi marcar os movimentos de outro jogador quando percebi, que sua pedra recuou a casa anterior, isso o caus, j no bastava os programas agora tambm esto alterando o movimento das pedras. Isso aconteceu com vrios jogadores geralmente com pontos mais altos.Concordo com vc! no caso da sala Bullet esto conseguindo reverter o tempo... simplesmente no justo.> Concordo com vc! no caso da sala Bullet esto> conseguindo reverter o tempo...> > simplesmente no justo.> > i tried bullet room and it took flyordie 5 seconds to even register that i made a move.so i get 12 moves before timing out if i know what moves im making.I don't know how to cheat, or what seems to be called programme. I do become annoyed at players who sit in the room and do not seem to want to play. Sometimes the room is full of players who do not want to play. i agree but how can it be stopedPeople cheat because they have very low self esteem. They can not handle losing. They must cheat to win to make themselves think they are better (smarter) (quicker)then anyone else. I started playing checkers over 50 years ago. It was a pleasure playing someone else who could either beat me or lose to me. At least we were on equal terms. I used to enjoy the fun in the game but the programs take the equal competition out of the game. Chess just takes me to long. With regards to cheat program, I tink it is a challenge, not to be afraid of because programs are made by human, it only mmeans that programs can be beaten by human.Dont correlate slow moves to cheat program because the opening and the mid game are the crucial part of the game that needs thorough analysis.I believe that they can stop the cheating in here and they just do not bother with it because they feel that it is just a game. To me, it is a disgrace and at the same time, the cheaters really do not become anything but a drone sitting there.Dearest Ladies and Dear Gentlemen,With courtesy I ask helpto get a cheat/prpgramm to win chess games.Thanking in advance, best regardsVincentseaYour device is not supported.
