Explore our latest gallery of Editors' Picks.Browse Editors' FavoritesExperience AI-Powered CreativityAs a student preparing for the ACT, you may probably have heard of Khan Academy – a free video library that covers math, science, and other subjects in short videos. In 2015, Khan Academy partnered with the College Board — the creators of SAT — in developing SAT prep materials that students can access for free. While the ACT and SAT are different, Khan Academy is still a great general resource for high school math and science concepts. Let's take a deeper dive into what Khan Academy is and how it can help you ace the ACT. Photo by Good Faces on Unsplash Founded in 2006, Khan Academy is a non-profit educational platform which offers numerous free videos that cover general education topics such as mathematics, reading, and chemistry; and focused-area subjects such as computer engineering, economics, and humanities (even life skills!). A part of Khan Academy's mission is to give underprivileged students a chance to quality education, and bridge the gap between learners and specific skill sets. As for teachers, Khan Academy aims to provide them with the materials necessary for creating a more holistic learning environment for students. Learners, teachers, and parents may create free accounts, even those students looking to prepare for admissions exams such as the SAT. Since its inception in 2006, Khan Academy has since helped many students and educators reach their learning targets. Here are some notable achievements Khan Academy has had so far: In 2019, the Khan Academy team was able to identify three best practices in correlation to how students' SAT scores aligned with practice material usage: leveling up skills, completing a full-length practice exam, and following personalized practice recommendations. 85% of freshman and sophomore college students said that Khan Academy equipped them with the skills and knowledge they needed after high school. Their international impact on education is also noteworthy. In a study conducted by MANAUS, 30 schools in Guatemala saw significant improvement in students' math scores when Khan Academy's pilot program was incorporated into traditional learning interventions done by teachers. In general, learners spoke mainly about the crucial role Khan Academy played in improving retention and mastery of the concepts studied. The platform also helped them build confidence in their ability to understand complex numerical processes and exceed score expectations. But for first time users of Khan Academy, particularly students preparing for the ACT, will the tool be of great help? Photo by Avel Chuklanov on Unsplash As mentioned earlier, Khan Academy has an existing partnership with the College Board in creating official SAT resources that learners can use for free. These tools include various practice materials, video tutorials, quizzes, and a personalized study guide. However, if you're a student preparing specifically for the ACT, Khan Academy's prep course might not be the best tool for you. This is because Khan Academy only offers SAT-specific content, but not ACT-specific ones. To give you a clearer picture of why this matters, below are direct comparisons of the 2 admission exams in terms of content. Both ACT and SAT... Have similar sections in a fixed order which don't repeat (i.e. Math, Reading, etc.); Uses a system that only counts correct answers; Contains passage-based Reading and English questions (English on the ACT; Writing and Language on the SAT); and Places heavy weightage on algebra A brief overview of their differences based on content: ACTSATContains a full section on Science (makes up one-fourth of your total score)Tests some scientific concepts in the reading section, but does not devote a full section to ScienceFocuses on geometry and trigonometric functions (comprises 30-45% of your ACT Math score)Geometry makes up less than 10% of SAT Math questions; trigonometry only covers 5%)Diagram of Math formulas (geometry formulas and laws) is not providedDiagram of Math formulas is providedYou can use a calculator for the entire Math section20 questions with NO CALCULATOR and 38 Questions with a calculatorTests Math concepts like trigonometric functions, logarithms, and matricesDoes not test certain Math concepts like trigonometric functions, logarithms, and matricesLaungauge of the Reading passages are all modern and easily understood by High School studentsSome reading passages or more than 150 years old, and having more advanced or unfamiliar vocabulary If you'll notice, the differences between ACT and SAT mainly revolve around their Math content. On the ACT, Math makes up one-fourth of your total score, while on the SAT, Math makes up half of your total score. In other words, if you consider Math as one of your challenging areas, you'd have better chances in the ACT. While Khan Academy isn't your best bet for a good ACT prep course, there may be other test prep tools that can help you meet your learning goals. One of these is Achievable's ACT prep course. The app provides students with a 21st century way of learning — a more personalized path towards your goals. Combining full-length practice exams, review quizzes, personalized study guide, and an easy-to-read online textbook, Achievable ensures that every tool and module is tailored to students' learning needs and capabilities. Finally, with Achievable's built-in study planner, learners like you won't have to worry about losing focus while going through the courses. The course maps out and reminds you exactly what you need to study. Our advanced personalization algorithm automatically targets areas that you need to focus on to improve your score. Pair this with the study plan you've created, and watch your performance improve! Teacher SettingsGo to the settings tab to customize your dashboard and manage student settings. This is also where you will find your class code! From here, you may adjust your teacher and class name, as well as edit your Class grade. You can even select a new teacher avatar!In "Class Preferences" you can:Manage how long assignments are available to students. Old assignments will disappear from the student's view after this length of time, which keeps their view less cluttered. Turn on "Assignments First" so that students must complete their assignments before exploring the rest of the appHide the Create and Videos tab from the student view if they find those distractingTurn off the background musicManaging StudentsFrom the students' tab, you can manage student information Select a student to edit their level or avatar. Teachers who are not using Clever can also add and delete students, as well as edit student names. Adding, removing, or switching classesIn the top right corner of the screen you can add or remove classes. If you teach multiple sections, this is where you will be able to switch between classes. Where can I access translated versions of Khan Academy resources?To get access to parent and teacher resources in a variety of languages, click here. The Daily Schedule for students 2-18 is currently available in the following languages: Español, Español - Perú, Español - EEUU, Português - Brasil, Български език, Deutsche, Հայերեն, Français, 繁体中文, and Bahasa Indonesia. The new learning dashboard is your personal homepage on Khan Academy. The dashboard gives you an easy way to find the best next things for you to do. It has a bunch of really cool things designed to help you learn math, and soon other subjects, really well on your own or with a coach. You can access it when you're signed in by clicking on the Khan Academy logo at the top of the page. Practice makes perfect Recommendations have been lined up for you on the dashboard. They should have the skills that are best for you to practice next. If you want to practice something in particular, no problem! It's a breeze to add the skills you want to focus on to your dashboard. If you have a coach helping you learn on Khan Academy, they can recommend skills for you too. Level up your skills Each day, we will unlock new chances for you to level up the skills you practiced on previous days. "Why do I have to wait a day for a chance to level up?" you ask. "I want to get new levels now!" Here's the thing, there's a lot of evidence that proving what you know over time is a really great way to ensure that you actually remember what you've learned. We hope the challenges are fun and rewarding as we've updated badges to recognize Mastery earned this way! See your progress at a glance As you're leveling up your skills, you can keep track of progress right on the dashboard. Points, badges, and skill levels are all visible and updated in realtime. Earn points and badges; Conquer the world of math! We've added new badges and updated the old ones to work with the new skill levels. You now earn bonus points for doing recommended skills and even more for leveling up your skills. The entire KA team has been working around the clock over the last few months to bring this exciting new experience together. Although we're just getting started with it, we're thrilled to see how you all use it and to get your feedback. What are you waiting for? Sign in to get started with the pretest, and get credit for what you already know. Onward! Want to learn a little more? Sal made a cool video about the learning dashboard! Check it out here. Breakfast/Get ready for an awesome day! And yes, change out of PJs ;8am - 9amAssuming you've gotten a good night of sleep, your thinking will be sharpest in the morning so let's start the day strong with some math! Whoo hoo!Khan Academy math practice has got your back. Our new Get ready for grade level courses are perfect for the start of a new school year with their focus on the essential math skills you will need for your upcoming school year.Course challenges and unit tests can be used to accelerate through material. If you don't have too many gaps, you should be able to get through a previous year's content in 1-3 hours. If you do have gaps, it may take a bit longer, but that is good! This is your chance to fill in those gaps that might otherwise hold you back in the future.Once you have mastered the Getting ready course, you can move on to your grade level course. Try to set a goal of leveling up at least 3 skills a week.You'll see that if you are able to put in at least a solid 30 minutes a day of math practice and keep leveling up skills, you'll see big gains and, most importantly, really see the world in new and exciting ways! Play. Ideally outside if weather permits. 9:40am - 10amWe just released the first version of reading comprehension practice on Khan Academy. It is grouped by grade level:2nd grade3rd grade4th grade5th grade6th grade7th grade8th gradeWe recommend starting at your grade level and doing 1-2 practice sets per day (or 10 practice sets per week). This should take about 10-20 minutes per day. If you find it difficult, completely okay to start at an earlier grade level. Likewise, if you find the passages and questions to be easy, feel free to move to higher grade levels.10:30am - 11am11am - 11:20amSilent reading. Curl up with a favorite book or magazine. Here is a great list of titles that you might want to get your hands on.10am - 10:30am11:20am - 11:40amKhan Academy GrammarRecommend starting by taking the course challenge a few times to figure out what you know and don't know.Journaling/writing. Things to write about/prompts:Write a funny or exciting adventure story about what happens when school is closed.What are you excited or worried about?Write a letter to yourself 10 years in the future. What do you want to tell your future self?How do you think the world will be different after COVID-19?For more inspiration, check out our list of grade 3-5 writing prompts.1pm - 2pm12pm - 1pm2pm - 8pmEnrichment: Khan Academy computer programmingProgramming computers is far more fun and creative than you probably ever imagined. Start by creating fun cartoons and animations and work your way up to creating fun games that your friend can play.8pm - 9pmRelax, go outside, work on passions, time with family.Lights out, time to sleep!Lunch - Listen to an educational podcast! Try Brains On! If you like science, Forever Ago, and if you like history, or Story Pirates to hear funny stories written by kids.If you're looking for more suggestions for music, dance, drawing, painting, reading and other activities, check out:Distance learning guide for parents features expert advice for motivating and engaging your kids and setting up for a successful year of distance learningBreak/walk/play.
