

I'm not robot

Table of contents The manual is divided into several sections. Some key areas include vehicle identification, displays and control elements, seats and mirrors, and various vehicle features. Additional information can be found in the following sources: owner's manual, vehicle manufacturer, or dealership staff. Vehicle features and options are discussed throughout the manual. These include status indicators, event data recording, and adaptive lighting functions. The vehicle identification number is located on a placard attached to the driver's side dashboard. Important displays and control elements can be found near the steering wheel, center console, and headliner. Sensors used in the vehicle include those for monitoring temperature, light, and humidity. Vehicle features and options also include automatic time setting, measurement units, and Driver Attention Camera. Connecting mobile devices to the vehicle is possible using various methods, including Apple CarPlay and Android Auto preparation. The manual also covers topics such as child safety, door and window locking, and assisted driving features. Other important functions include automatic headlight control, daytime driving lights, adaptive lighting functions, and Automatic High Beam Assistant. Advanced safety features include forward collision warning, intersection warning, pedestrian warning, lane departure warning, active blind spot detection, side collision mitigation, and rear-end collision preparation.
