\r\rAfter watching the video, click on the Interactive Lyrics tab for infoboxes with more detailed information and vocabulary related to the working together.24/7, 365, Your body systems keep you alive. It's life or death, that's one way
to say this, Unless your body maintains its homeostasis, Or inner balance, yeah, so out of sight, 12 body systems and they keep you alive. Let's start with the one that carries your blood, The circulatory system if you know what's up. The circulatory's three main parts Are the blood, blood vessels and heart. Now, we got the respiratory. It helps you to
breathe, here's an extra story: It brings oxygen to your lungs from the air, And removes all the CO2 that's in there. Next, the digestive true, That's the system that breaks down all your foodInto nutrients that your cells need to
be nervous, But the nervous system is next and its purpose, Is kinda like an information highway, Sending messages from Monday to Friday. Weekends, too! What does it contain? Your spinal cord, yeah, your nerves and your brain. Whatever you're doing, wherever, whenever, 12 systems working together. 24/7, 365, Your body systems keep you alive.
x2Moving on with our mission, Yeah, it's the muscular system. It works with the skeletal to help you move, So contract and relax, that's what muscles do. The skeletal system gives you report and hormones. They help indicate hunger, and
that's Why I stack pancakes like a lumberjack. It's really quite critical, but up next, The excretory system is in effect. It gets rid of urine, thank your kidneys, Or not when you need to use a toilet quickly. What's on the outside? Are you getting me? Skin, hair and nails are the integumentary system But here's the twist: Without that system you'd look like
this.And your immune system defends Against disease and pathogens. White blood cells break 'em downOr make antibodies for next time they come around. Your immune system is the reproductive. Gents and ladies, that's how we make
babies, With sperm and eggs, heard of 'em, maybe?12 systems work hard, they're not lazy. Whatever you're doing, wherever, whenever, 12 systems working together. 24/7, 365, Your body systems keep you alive. x2Ay yo, I need my circulatory,
nervous, respiratory, digestive, lymphatic, excretory. I mean, I also need my muscular, immune, skeletal, endocrine, integumentary and reproductive, on the floor! Yeah, that's them, the body systems, of your body, within the system.", "lyrics_no_html": "Whatever you're doing, wherever, whenever, 12 systems working together.24/7, 365, Your body
systems keep you alive . It's life or death, that's one way to say this, Unless your body maintains its homeostasis, Or inner balance, yeah, so out of sight, 12 body systems and they keep you alive. Let's start with the one that carries your blood, The circulatory system if you know what's up. The circulatory's three main partsAre the blood, blood vessels and
 heart. Now, we got the respiratory. It helps you to breathe, here's an extra story: It brings oxygen to your lungs from the air, And removes all the CO2 that's in there. Next, the digestive \u2014 true, That's the system that breaks down all your foodInto nutrients that your cells need To grow, to heal and for their energy. As you eat, savor the taste, The
 digestive helps your body get rid of the waste. Hey \u2014 no need to be nervous, But the nervous system is next and its purpose, Is kinda like an information highway, Sending messages from Monday to Friday. Weekends, too! What does it contain? Your spinal cord, yeah, your nerves and your brain. Whatever you're doing, wherever, whenever, 12
systems working together.24/7, 365, Your body systems keep you alive. x2 Moving on with our mission, Yeah, it's the muscular system gives you support and Helps you move, So contract and relax, that's what muscles do. The skeletal system gives you support and Helps you move, So contract and relax, that's what muscles do. The skeletal system gives you support and Helps you move, So contract and relax, that's what muscles do. The skeletal system gives you support and Helps you move, So contract and relax, that's what muscles do. The skeletal system gives you support and Helps you move, So contract and relax, that's what muscles do. The skeletal system gives you support and Helps you move, So contract and relax, that's what muscles do. The skeletal system gives you support and Helps you move, So contract and relax, that's what muscles do. The skeletal system gives you support and Helps you move, So contract and relax, that's what muscles do. The skeletal system gives you support and Helps you move, So contract and relax, that's what muscles do. The skeletal system gives you support and Helps you move, So contract and relax, that's what muscles do. The skeletal system gives you support and Helps you move, So contract and relax, that is a skeletal system gives you support and Helps you move, So contract and the skeletal system gives you move gives you support and the skeletal system gives you muscless 
The endocrine, it's all glands and hormones. They help indicate hunger, and that's Why I stack pancakes like a lumberjack. It's really quite critical, but up next, The excretory system is in effect. It gets rid of urine, thank your kidneys, Or not \u2014 when you need to use a toilet quickly. What's on the outside? Are you getting me? Skin, hair and nails are
 the integumentary system\u00a0But here's the twist:Without that system you'd look like this.And your immune system defendsAgainst disease and pathogens.White blood cells break 'em downOr make antibodies for next time they come around. Your immune system works with the lymphatic ,Which makes and moves lymph , and that isWhere the
 white blood cells live. The last system is the reproductive. Gents and ladies, that's how we make babies, With sperm and eggs, heard of 'em, maybe?12 systems work hard, they're not lazy. Whatever you're doing, wherever, whenever, 12
systems working together.24/7, 365, Your body systems keep you alive. x2 Ay yo, I need my circulatory, nervous, respiratory, digestive, lymphatic, excretory. I mean, I also need my muscular, immune, skeletal, endocrine, integumentary and reproductive, on the floor! Yeah, that's them, the body systems, of your body, within the system.", "standards":

 {"id":12,"value":11,"name":"11"},{"id":13,"value":12,"name":"12"}] data-units=[] data-text to speech=false> About This Quiz Welcome to our Body Systems Test Questions and Answers quiz, an invaluable tool designed to enhance your understanding of human anatomy and physiology. This quiz is tailored for students, educators, and anyone
 interested in the intricate workings of the human body. Our comprehensive quiz covers all major body systems, including the circulatory, respiratory, digestive, nervous, and musculoskeletal systems. Each section is packed with detailed questions that challenge your knowledge and improve your comprehension of how these systems function and
 interact within the body. Whether you are preparing for a school exam, studying for professional health sciences tests, or simply looking to increase your medical knowledge, this quiz provides the perfect opportunity to test your learning and identify areas needing improvement. With each question, you'll receive instant feedback, including
explanations and insights that will aid in reinforcing your understanding of the material. Correct Answer A. It breaks down foods into nutrients that can be used by the body. This process involves the mechanical and chemical
breakdown of food in the mouth, stomach, and intestines, where enzymes and acids break down complex molecules into simpler ones that can be absorbed by the body. These nutrients are then used for energy, growth, repair, and other bodily functions. Explanation The heart is the organ responsible for pumping blood throughout the body. It is a
muscular organ located in the chest, slightly left of the center. The heart functions by contracting and relaxing, which facilitates the circulation of blood through the circulatory system. This process delivers oxygen and nutrients to tissues and removes waste products like carbon dioxide. The lungs, liver, and kidneys have different primary functions:
the lungs facilitate gas exchange, the liver processes nutrients and detoxifies, and the kidneys filter blood to produce urine. Correct Answer Explanation The lungs are part of the respiratory system, which is responsible for the exchange of oxygen and carbon dioxide in the body. They play a crucial role in the process of respiratory system, which is responsible for the exchange of oxygen and carbon dioxide in the body. They play a crucial role in the process of respiratory system, which is responsible for the exchange of oxygen and carbon dioxide in the body.
 taken in and carbon dioxide is expelled. The respiratory system also includes other organs such as the trachea, bronchi, and diaphragm, which work together to facilitate breathing and ensure proper oxygenation of the blood. Therefore, the correct answer is respiratory. Correct Answer Explanation The heart is part of the circulatory system. It is
responsible for pumping blood throughout the body, delivering oxygen and nutrients to cells and removing waste products. The circulatory system is responsible for breaking
down and absorbing nutrients from food, and the excretory system is responsible for removing waste products from the body. Correct Answer A. Inhale oxygen and exhale waste like carbon dioxide. Oxygen is needed by the body for
various metabolic processes, and carbon dioxide is a waste product that needs to be removed. This process is essential for maintaining the body's overall balance and ensuring the proper functioning of cells and organs. The other options mentioned, inhaling carbon dioxide and exhaling oxygen, and moving nutrients throughout the body, are not
accurate functions of the respiratory system. Correct Answer Explanation The esophagus is the correct answer because it is the tube that connects the mouth to the stomach for further digestion and absorption. The trachea is part of the
respiratory system, the ureters are part of the urinary system, and the stomach is the organ where food is further digested after passing through the esophagus. Explanation The nervous system is responsible for receiving and processing information from both internal and external sources. This includes stimuli such as touch, temperature, pain, and
sound. Through specialized cells called neurons, the nervous system can transmit these signals to the brain for interpretation and response. This function allows us to be aware of our surroundings and response to the nervous system is to receive stimuli from inside
 and outside the body" is true. Explanation Digestion starts in the mouth. This is where the process of breaking down food begins, as the saliva in the mouth contains enzymes that start to break down the food into smaller pieces, making it easier to swallow and digest further down the
digestive tract. Correct Answer Explanation The pancreas is not part of the respiratory system. The respiratory system is responsible for the exchange of gases, specifically oxygen and carbon dioxide, whereas the pancreas is an organ of the digestive system. It plays a crucial role in producing digestive enzymes and hormones such as insulin and
glucagon, which regulate blood sugar levels. Therefore, the pancreas is not involved in the process of respiratory system is to filter toxins and excess water out of cells. This system includes
organs such as the kidneys, liver, and lungs, which work together to remove waste products from the body. The kidneys filter the blood and produce urine, while the liver helps detoxify harmful substances. The lungs eliminate carbon dioxide, a waste product of cellular respiration. This process helps maintain the body's balance of fluids and
electrolytes, ensuring that waste products are eliminated effectively. Correct Answer Explanation The diaphragm is the correct answer because it is the main muscle responsible for breathing properly. It is a dome-shaped muscle located beneath the lungs that contracts and relaxes to control breathing. When the diaphragm contracts, it flattens and
moves downward, increasing the volume of the chest cavity and causing air to be drawn into the lungs. When it relaxes, the diaphragm moves back up, decreasing the volume of the chest cavity and causing air to be expelled from the lungs. Therefore, the diaphragm plays a crucial role in the process of inhalation and exhalation. Correct Answer A.
Respiratory and circulatory Explanation The respiratory systems work together to ensure that oxygen reaches the bloodstream and carbon dioxide is removed from the bloodstream and carbon dioxide is removed from the bloodstream and carbon dioxide is removed from the bloodstream.
circulatory system transports these gases to and from the body's cells. The respiratory system includes the lungs, where oxygen is taken in and carbon dioxide is expelled, while the circulatory system includes the lungs. Correct Answer
Explanation The trachea, commonly known as the windpipe, is a vital component of the respiratory system. It serves as the main airway, providing a path for inhaled air to move from the horse and mouth into the lungs. The trachea is located just below the larynx (voice box) and extends to the bronchi, which are airways that branch deeper into the
lungs. Unlike the circulatory, digestive, or excretory systems, the respiratory system is specialized for gas exchange, facilitating the intake of oxygen and the release of carbon dioxide, which is essential for cellular metabolism. Explanation Joints are the correct answer because joints are the specific locations where two or more bones meet. Tendons
and ligaments are not locations where bones meet, but rather connective tissues that help support and stabilize joints. The refore, the correct answer is joints. Explanation The largest organ in the human body is the skin. It covers the entire body and serves as a protective barrier against external elements. The skin plays a crucial role in regulating
body temperature, preventing dehydration, and protecting the underlying tissues and organs. It also contains sensory receptors that allow us to feel touch, pain, and temperature. Correct Answer Explanation Arteries are the blood in the
lungs, it is pumped by the heart into the arteries, which then distribute the oxygen-rich blood to the various tissues and organs. This explanation is based on the understanding of the circulatory system and the roles of different blood vessels. Correct Answer Explanation The esophagus is a crucial part of the digestive system. It is a muscular tube that
connects the throat (pharynx) with the stomach. The primary function of the esophagus is to transport food and liquids from the mouth to the stomach, a process facilitated by muscular contractions known as peristalsis. Unlike the circulatory system, which circulatory systems, which are involved in breathing and
waste removal, respectively, the digestive system is specifically designed for breaking down food, absorbing nutrients, and eliminating solid waste. Correct Answer Explanation Skeletal muscles are attached to bones and assist in movement. They are responsible for voluntary movements and are under conscious control. These muscles work by
contracting and relaxing, allowing us to move our body parts such as arms, legs, and fingers. Smooth muscles, on the other hand, are found in the walls of organs and blood vessels, while cardiac muscles are specific to the heart. Lateral is not a type of muscle, but rather refers to the side of the body. Correct Answer Explanation Capillaries are the
smallest blood vessels in the body. They are responsible for the exchange of oxygen, nutrients, and waste products between the blood and the surrounding tissues. Capillaries have thin walls, allowing for easy diffusion of substances. They connect arteries to veins and are found throughout the body, making them crucial for maintaining proper blood
flow and delivering necessary substances to all cells. Correct Answer Explanation The muscular system is responsible for providing movement to the body. Muscles are attached to bones and contract and relax to allow for movement to the body. Muscles are attached to bones and contract and relax to allow for movement to the body. Muscles are attached to bones and contract and relax to allow for movement to the body.
muscular system also helps in maintaining posture and stability. Without the muscular system, the body would be unable to move or perform any physical actions. Correct Answer Explanation Smooth and cardiac muscles are both involuntary.
movements such as digestion and blood flow. Cardiac muscles are found in the heart and are responsible for the involuntary contraction and relaxation of the heart. Therefore, both smooth and cardiac muscles are not under conscious control and are classified as involuntary muscles. Correct Answer Explanation The cerebellum is the part of the brain
that controls balance and coordination. It receives information from the sensory systems, the spinal cord, and other parts of the brain to coordinate voluntary movements and maintain balance. It plays a crucial role in fine motor skills, posture, and overall movement control. The cerebellum works in conjunction with other brain regions to ensure
smooth and coordinated movements. Explanation The liver is the correct answer because it is the organ responsible for producing bile. Bile is a substance that helps in the gallbladder before being released into the small intestine when needed. The
pancreas also plays a role in digestion by producing digestive enzymes, but it does not produce bile. The gallbladder stores bile but does not produce bile. Correct Answer Explanation Tendons connect skeletal muscles to the bone.
Tendons are tough, fibrous connective tissues that attach muscles to bones, allowing for movement and stability. They are composed of collagen fibers and are capable of withstanding high amounts of tension. When muscles contract, tendons transmit the force generated by the muscles to the bone, causing movement. Without tendons, muscles would
not be able to move the bones and perform their functions. Ligaments, on the other hand, connect bone to bone, joints allow for movement between bones and blood vessels supply nutrients and oxygen to the muscles and bones. Quiz Review Timeline (Updated): May 1, 2024 + Our quizzes are rigorously reviewed, monitored and continuously updated
by our expert board to maintain accuracy, relevance, and timeliness. May 01, 2024 Quiz Edited by ProProfs Editorial Team Mar 09, 2011 Quiz Created by Sarah Smith You are searching for Flocabulary answers to
 Flocabulary are checked twice before publishing them to you. So, please do share as well if it helps you. For your convenience, we divided answers for Grade 5 to Grade 12 because we all know Grade K to Grade 4 quizzes can be answered
easily. But dont worry, a few hard topics are covered by our team as well. Find the topics below to get exclusive answers: Below you can findFlocabulary Marie Curie & Determination quiz answer key for free: Q.1. degree in Ans: chemistry Q.4. Why did Curie change her first name from Maria to Marie? Ans: to sound more French Q.5. What science term did Curie was not found by Curie to be radioactive? Ans: scandium Q.8. True or False: Curie was
Sorbonnes first female professor Ans: TrueQ.9. How did Curie help soldiers during World War I? Ans: by providing x-rays on the fieldQ.10. What was the cause of Marie Curies death? Ans: Radiation exposure Click the below button to find both Quiz answer key and answers for Read and Respond section: Below you can findthe Flocabulary Science
Inquiry quiz answer key for free: Q.1. Which of the following describes a scientific process? Ans: Pedro plants a sapling in his front yard. He observes and measures it each day. Using his observations, he hypothesizes that the leaves grow most in the spring.Q.2. On which of the following could a scientific claim be based? Ans: experiments and
studies Q.3. Sandra claims that invisible fairies live above the clouds where no one can see, hear or feel them. Which of the following describes a scientific
law? Ans: Any two objects in the universe attract each other with a force called gravity.Q.6. A scientific theory is a Ans: Well-tested explanation of why global temperatures are rising.Q.8. Which of the following
describes the relationship between scientific theories and scientific theories and scientific theories and models cannot be modified Ans: FalseQ.10. Which of the following is an example of pseudoscience? Ans: A claim that pretends to be scientific but
has not actually been tested. Find the topics below to get exclusive answers: Below you can find the Flocabulary Nutrition is Ans: balancing different kinds of food.Q.2. Which of these is not a macronutrient? Ans: vitaminsQ.3. Carbohydrates give your body Ans: good energy.Q.4. Which of these is
a good source of protein? Ans: beansQ.5. True or False: Fat is an important part of our diets. Ans: TrueQ.6. Which of these is not a good source of fat? Ans: riceQ.7. Vitamins and minerals are both Ans: small compounds.Q.8. Which of these is not a good source of fat? Ans: riceQ.7. Vitamins and minerals are both Ans: waterQ.10. In which
nutrient group would you find sugary sweets? Ans: carbohydrates Below you can findthe Flocabulary Ecosystems guiz answer key for free: Q.1. What is the correct path of how energy flows in a food chain? Ans: producer, consumer, predator, decomposerQ.3. Which
event might disrupt a stable ecosystem? Ans: An invasive species enter the environment.Q.4. The relationship between a carnivore and an herbivore can be stated as Ans: predator and preyQ.5. Which is an example of a parasite and host relationship? Ans: a tapeworm and a humanQ.6. An ecosystem is defined as Ans: a group of organisms and the
habitat they share.Q.7. Carrying capacity is Ans: the number of organisms an ecosystem can support.Q.8. Photosynthesis is a process that Ans: green plants use to produce food.Q.9. What is a scavenger? Ans: elements like carbon,
nitrogen, and phosphorus Click the below button to find both Quiz answer key and answers for Read and Respond section: Below you can find the Flocabulary Photosynthesis guiz answer key for free: O.1. Photosynthesis occurs inside of which organelle? Ans: chloroplastsO.2. Which of the following is converted into chemical energy during
photosynthesis? Ans: light energyQ.3. Photosynthesis? Ans: light energyQ.3. Photosynthesis occurs Ans: in the cells of autotrophs.Q.4. How do plants do with most of the
oxygen produced in photosynthesis? Ans: They release most of the oxygen into the atmosphere.Q.7. Why is photosynthesis important to animals because Ans: oxygen, which animals breathe, is released as a byproduct.Q.9. Animals, including
humans Ans: get glucose from the food they eat.Q.10. True or false: Photosynthesis is an important part of the carbon cycle Ans: True Click the below button to find both Quiz answer key for free: Q1. The British naturalist Charles Darwin
developed a theory after observing species in the Galapagos Islands. What is the name of this theory? Ans: Theory of Evolution.Q2. Natural selection means Ans: individuals that are less fit die out.Q3. A mutation Ans: is a random change in a cells DNA.Q4. Severe or
sudden changes in Earths atmosphere can cause entire species of animals to die. When all of the members of species die out, it is called Ans: extinction.Q5. New forms of drug-resistant bacteria can evolve quickly because Ans: When a drug kills most of the bacteria, the ones left to breed are those that have a natural resistance to the drug.Q6.
Evolution explains how Earths present-day species developed from earlier species through Ans: natural selection.Q7. Genes are strands of found on chromosomes in the nucleus of a living cell Ans: DNAQ8. A species has a better chance of surviving if it has greater variation in its Ans: genes.Q9. All of the following provide evidence for evolution
except Ans: sexual reproductionQ10. What increases the chances that a trait will be passed on to offspring? Ans: if the trait helps the organism compete for resources Find the topics below to get exclusive answers: Below you can findthe Flocabulary Space Rocks quiz answer key for free: Q.1. Which of the following is not a space rock? Ans: A StarQ.2.
True or False: Asteroids orbit the sun Ans: TrueQ.3. Which of the following space rocks is mostly made of ice, gas, and dust? Ans: A CometQ.5. What generally happens when a comet nears the sun? Ans: Its gas burns upQ.6. How are
```

meteoroids different from asteroids? Ans: Meteoroids are smaller than asteroids.Q.7. What generally happens when a meteoroid falling through Earths atmosphere is called a Ans: meteoroids are smaller than asteroids.Q.7. What generally happens when a meteoroid falling through Earths atmosphere is called a Ans: meteoroids are small space rock that falls to the ground on Earth is called a Ans: meteoroids are smaller than asteroids.Q.7. What generally happens when a meteoroid falling through Earths atmosphere is called a Ans: meteoroids are small space rock that falls to the ground on Earth is called a Ans: meteoroid falling through Earths atmosphere is called a Ans: meteoroids are smaller than asteroids.Q.7. What generally happens when a meteoroid falling through Earths atmosphere is called a Ans: meteoroids are small space rock that falls to the ground on Earth is called a Ans: meteoroid falling through Earths atmosphere is called a Ans: meteoroids are smaller than asteroids.Q.7. What generally happens when a meteoroid falling through Earths atmosphere? Ans: It catches fire and burns up.Q.8. The flash of light from a meteoroid falling through Earths atmosphere? Ans: It catches fire and burns up.Q.8. The flash of light from a meteoroid falling through Earths atmosphere? Ans: It catches fire and burns up.Q.8. The flash of light from a meteoroid falling through Earths atmosphere? Ans: It catches fire and burns up.Q.8. The flash of light from a meteoroid falling through Earths atmosphere? Ans: It catches fire and burns up.Q.8. The flash of light from a meteoroid falling through Earths atmosphere? Ans: It catches fire and burns up.Q.8. The flash of light from a meteoroid falling through Earths atmosphere? Ans: It catches fire a

FunnelQ.2. Most tornadoes last about Ans: 10 minutesQ.3. True or False: Scientists arent totally sure how tornadoes end Ans: TrueQ.4. Which of the following is used to measure the intensity of tornadoes end Ans: TrueQ.4. Which of the following is used to measure the intensity of tornadoes form when a warm and a cool collide, forming a thunderstorm called a supercell Ans: Air massQ.7. Winds blowing in opposite directions form a cylinder called when it is tipped up? Ans: MesocycloneQ.9. True or False: A tornado is pulled to the ground by a downdraft, rain, or hail Ans:

```
TrueQ.10. Which of the following is the safest place to be during a tornado? Ans: A basement with no windows Click the below button to find both Quiz answer key for free: Q.1. The ecosystems in a biome generally share the same Ans: ClimateQ.2
Deserts are best known for being Ans: DryQ.3. In a desert, evaporation is more than precipitation Ans: GreaterQ.4. Deserts are commonly found around degrees of latitude Ans: 30Q.5. True or False: Deserts can be very cold Ans: TrueQ.6. Which of these adaptations helps cacti hold on to water? Ans: sprawling rootsQ.7. How do most desert animals
conserve water? Ans: by resting during the dayQ.8. Sandgrouses can store water in their Ans: FeathersQ.9. How have deserts been changing in recent years? Ans: They are growing quickly.Q.10. Which of these is an effect of desertification? Ans: Loss of fertile land to farm. Below you can find the Flocabulary Earthquakes quiz answer key for free: Q.1.
Which of these is not one of Earths layers? Ans: epicenterQ.2. The churning movement of the mantle is due to Ans: convection currentsQ.3. Which of these most resembles Earths division into tectonic plates? Ans: A cracked eggshellQ.5. The area on the fault line where an
earthquakes energy is first released is called the Ans: HypocenterQ.6. What can a seismogram tell us about an earthquake usually measures or higher Ans: 7Q.8. While it is impossible to predict an earthquake, they typically occur near Ans: Both A &
BQ.9. What is the Ring of Fire? Ans: The area around the Pacific Ocean where many earthquake Ans: True or False: Aftershocks can last for years after an earthquake Ans: True or False: The total amount of water on Earth is constantly changing Ans:
FalseQ.2. Which of the following describes evaporation? Ans: Water in the air cools down and forms droplets.Q.3. Which of the following describes evaporation? Ans: Water turns into steam or vapor and rises into the air.Q.4. What happens after condensation to cause precipitation? Ans: Water in the air cools down and forms droplets.Q.3. Which of the following describes evaporation? Ans: Water in the air.Q.4. What happens after condensation to cause precipitation? Ans: Water in the air cools down and forms droplets.Q.3. Which of the following describes evaporation?
When it rains, all of the water is absorbed back into the ground Ans: FalseQ.6. Which of the following is a type of precipitation? Ans: All of the above Q.7. What makes water move through the water cycle? Ans: The sunQ.9. What part of the water cycle do the
raindrops represent? Ans: PrecipitationQ.10. Where does runoff end up? Ans: All of the above Click the below button to find both Quiz answer key for free: Q.1. How do sedimentary rocks form on Earths surface? Ans: In
horizontal layersQ.2. What are strata? Ans: Rock layersQ.3. What is normally found at the lowest stratum? Ans: The oldest rock.Q.4. Stratigraphy is the following describes the relative age of someone or something? Ans: Kaitlyn is
younger than Dillon.Q.7. True or false: Sometimes older rocks end up on top of younger rocks? Ans: TrueQ.8. Using a substances rate of decay to determine its age is an example of Ans: Absolute datingQ.9. What happened during the Cambrian explosion? Ans: Many animals first appeared.Q.10. Which of the following rock layers contains the youngest
fossils? Ans: A Click the below button to find both Quiz answer key and answers for Read and Respond section: Below you can findthe Flocabulary Weather quiz answer key for free: Q.1. What is the order of the events for the water cycle on a typical warm day? Ans: evaporation, condensation, precipitationQ.2. Water located in wells underground is
Ans: ground water.Q.3. The lowest level of the atmosphere Q.6. A large body of air that has similar pressure, temperature, and atmospheric conditions is called a(n) Ans: Air
mass.Q.7. The name of the narrow belt of high-speed wind in the stratosphere is the Ans: Jet streamQ.8. The leading edge where one weather frontQ.9. The transfer of heat energy by the circulation of warm air is called Ans: thermal convection.Q.10. Which is a major cause of global warming? Ans: The
greenhouse effect Find the topics below to get exclusive answers: Click the below button to find both Quiz answer key and answers for Read and Respond section: Below you can find the following is a property of a liquid? Ans: It takes
the shape of the container you choose.Q.3. What does all matter have? Ans: Mass.Q.4. Atoms of a move around the most Ans: GasQ.5. Which form of matter does not take the shape of a container you put it in? Ans: Solid.Q.7. Which form of matter
has no definite shape, form or volume? Ans: GasQ.8. What would cause a liquid to turn into a solid? Ans: Grown or volume? Ans: Grown or volume? Ans: Grown or volume? Ans: GasQ.8. What would cause a liquid to turn into a solid? Ans: Grown or volume? Ans: GasQ.8. What would cause a liquid to turn into a solid? Ans: Grown or volume? Ans: Grown or volume

force of gravity do to objects? Ans: It pulls them together.Q.3. How does gravity on Earth compare to gravity on Earth.Q.4. Sir Isaac Newton came up with a theory about in 1687 Ans: GravityQ.5. What does the word mass mean? Ans: The amount of matter in something.Q.6. True or False: Objects that have
more mass also have more gravity Ans: TrueQ.7. Why would it be harder to jump on the planet Jupiter than on Earth? Ans: TrueQ.7. Why would it be harder to jump on the planet spinning around the sun.Q.9. Based on the picture, would Man A or Man B have more
gravity? Ans: Man BQ.10. Imagine you throw a baseball on Earth. Then, you travel to a planet with less gravity than Earth and throw the same baseball would go farther on the following would be true? Ans: The baseball would go farther on the following would be true? Ans: The baseball would go farther on the other planet. Below you can find the Flocabulary Heat Transfer quiz answer key for free: Q.1. There are
different methods of heat transfer Ans: ThreeQ.2. Conduction is the transfer of heat through Ans: Direct contact.Q.3. If you pour hot soup into a bowl, and the bowl stays cool to the touch, you can assume that Ans: The bowl is a good insulator of heat.Q.4. The process by which heat moves through air or liquid is called Ans: ConvectionQ.5. Which
method of heat transfer can occur in empty space? Ans: RadiationQ.6. A good conductor of heat Ans: Let heat moves through it easily.Q.7. Which of the following is the best example of a heat conductor? Ans: A metal frying panQ.9. What is another name for
heat? Ans: Thermal energy.Q.10. Which of these is the best example of heat transfer through radiation? Ans: Warming up leftover pasta in the microwave Click the below button to find both Quiz answer key and answers for Read and Respond section: Below you can find be through radiation? Ans: Warming up leftover pasta in the microwave Click the below button to find both Quiz answer key for free: Q.1. What
must be true if a waves wavelength is short? Ans: Its frequency is high.Q.2. What is one-way radio waves are absorbed by water in food.Q.4. How can humans detect infrared waves? Ans: They feel them as heat.Q.5. True or false:
Electromagnetic radiation cannot travel through a vacuum Ans: FalseQ.6. How fast do electromagnetic waves travel? Ans: At the speed of light.Q.7. Which color has the shortest wavelength in the visible spectrum? Ans: Violet.Q.8. Which of the following can block some UV rays? Ans: The ozone layerQ.9. Which type of electromagnetic radiation carries
the most energy and has the highest frequency? Ans: Gamma rays Below you can find the Flocabulary Chemical Reactions quiz answer key for free: Q.1. What happens in a chemical reaction? Ans: Substances interact to form one or more
new substances.Q.2. The reactants are Ans: The substances present when the reaction, what happens to the total number
of each type of atom? Ans: The total number of each type of atom always stays the same.Q.6. Identify the product(s) of the following reaction: H2CO3->H2O+CO2 Ans: H2O and CO2Q.7. In a science experiment, Marisa concludes that no chemical reaction has occurred. What evidence would support this conclusion? Ans: No new substance was
formed.Q.8. In a science experiment, Javi concludes that a chemical reaction has occurred. What evidence would support this conclusion? Ans: A substances color and odor changed.Q.9. In a science lab, burning steel wool creates only iron oxide.Q.10. True or false:
In a chemical reaction, atoms of elements cannot be present in the products if they were not present in the reactants Ans: True Click the below button to find both Quiz answer key and answers for Read and Respond section: Click the below button to find both Quiz answer key and answers for Read and Respond section: Click the below button to find both Quiz answer key and answers for Read and Respond section: Click the below button to find both Quiz answer key and answers for Read and Respond section: Click the below button to find both Quiz answer key and answers for Read and Respond section: Click the below button to find both Quiz answer key and answer key a
both Quiz answer key and answers for Read and Respond section: Find the topics below to get exclusive answers: Below you can find the following is true about CO2? Ans: It is a greenhouse gas.Q.2. Which of the following can be a result of increased greenhouse gas
emissions? Ans: All of the above.Q.3. Who will be hit the hardest by climate change? Ans: the poorest nationsQ.4. By the year 2050, global food demand is expected to Ans: IncreaseQ.5. True or False: All forms of energy emit carbon dioxide Ans: FalseQ.6. What do we need to do to get CO2 emissions all the way to zero? Ans: develop new technologies
ideas and advances.Q.7. Current wind, solar, nuclear and hydroelectric energy technologies Ans: split water molecules to make fuel like a plant.Q.9. What is solar paint? Ans: material like solar panels that could be painted on roofs or
walls.Q.10. What could we put high in the air to create energy? Ans: wind turbines Below you can findthe Flocabulary Simple Machines quiz answer key for free: Q.1. When you use a simple machine to do work, ___ Ans: distance increases and force decreases.Q.3. Genesis is
moving a box of books into her treehouse. How will the amount of work change if she uses an inclined plane to get to the treehouse? Ans: The amount of work will not change when she uses the inclined plane and lowering objects Q.5. Which simple machine would be most helpful for cutting
fruit? Ans: a wedgeQ.6. A screw could best be used for which of the following is an example of a lever being used to do work? Ans: A woman uses a crowbar, a stick that can be moved back and forth to raise the lid on a box.Q.8. Which of the following is an example of a whee
and axle being used to do work? Ans: A boy rolls down the street on roller skates.Q.9. Which of the following is an example of a compound machine? Ans: A wheel, lever and wedge that, used
together, open a can Below you can findthe Flocabulary Space Exploration quiz answer key for free: Q.1. After World War II, the US was locked in a space race with Ans: the Soviet Union.Q.2. In which mission did the US first land a man on the moon? Ans: Apollo 11Q.3. What did space scientists find on Mars? Ans: a frozen lakeQ.4. Which of the
following is true about the International Space Station? Ans: It was built from separate parts sent to space.Q.5. Astronauts go to live on the ISS is about equal to the force of gravity on Earth. Ans: FalseQ.7. Which of these happens to astronauts
in space without the pull of gravity? Ans: Their vertebrae spread out.Q.8. On average, astronauts grow percent in space Ans: ThreeQ.9. Which of these do engineers do to assist space travel? Ans: 2030 Social Studies >> Ancient World History Find the topics below
to get exclusive answers: Below you can findthe Flocabulary The Fertile Crescent quiz answer key for free: Q.1. The fertile crescent got its name because it Ans: is thought to be one of the earliest written sets of laws.Q.3. The Tigris and
Euphrates are Ans: rivers that were important to ancient civilizations in Mesopotamia.Q.4. Gilgamesh may be the worlds most famous Sumerian leader because he Ans: had his adventures written in long poems.Q.5. Which of these people was said to have built the Hanging Gardens of Babylon? Ans: NebuchadnezzarQ.6. The Hebrews were unlike
other cultures at the time because they Ans: believed in a single god.Q.7. Sumerian farmers built canals to Ans: prevent rivers from flooding and move water where they needed it.Q.8. What was a city-state? Ans: a city that had its own ruler and government much like states todayQ.9. The Sumerians mainly used cuneiform to Ans: keep track of taxes
and government issues.Q.10. The first gold coins were issued by Ans: the Lydians. Below you can findthe Flocabulary Ancient Greece quiz answer key for free: Q.1. Which of the following is atruestatement? Ans: Greek city-states were surrounded by walls and originally built for protection.Q.2. The Athenians were known for
                                                                                                                                                                                                                 Ans: expected to participate in their governmentQ.5. Who was Platos most famous student? Ans: AristotleQ.6. The Odysseyis a Greek epic because it is
                                                                                   Ans: asking a lot of questionsQ.4. In the early democracy of Athens, citizens were
                                                             Ans: a famous temple dedicated to AthenaQ.8. Which of the following is afalsestatement? Ans: Alexander the Great wroteThe Republic, a book about the best form of government.Q.9. Mount Olympus was
                                                                                                                                                                                                                                                                                                                                                                      Ans: believed to be where the Greek gods livedQ.10. What was an agora? Ans: The marketplace
where residents could shop, trade and gossip Click the below button to find both Quiz answer key and answers for Read and Respond section: Click the below button to find both Quiz answer key and answers for Read and Respond section: Click the below button to find both Quiz answer key and answers for Read and Respond section: Click the below button to find both Quiz answer key and answers for Read and Respond section: Click the below button to find both Quiz answer key and answers for Read and Respond section: Click the below button to find both Quiz answer key and answe

                                                                                                                                                                                                                                              of a nation Ans: goods and servicesQ.2. What is an example of a good and/or service? Ans: paying a repairman to fix your bikeQ.3. Whose spending is included in GDP? Ans: all of the
                                                           minus imports Ans: exportsQ.5. When is GDP mean? Ans: gDP is calculated using current prices.Q.7. What does real GDP mean? Ans: GDP is calculated taking inflation into account.Q.8. If Chinas GDP was 10 trillion and its population 1.4
billion in 2014, what is the correct way to solve for Chinas GDP per capita? Ans: 10 trillion divided by 1.4 billionQ.9. In 2014, Americas GDP was
                                                                                                                                                                                                                        trillion Ans: 17Q.10. True or false: A fall in per capita GDP means economic growth and productivity? Ans: False Click the below button to find both Quiz answer key and answers for Read and
Respond section: Find the topics below to get exclusive answers: What Is History? Below you can findthe Flocabulary Math What Is History quiz answer key for free: Q.1. What is another term for a document created at the time of or by a person who was present at a historical event? Ans: primary sourceQ.2. How could you use the above source in
your research? Ans: as a secondary source that gives background on Pocahontass visit to EnglandQ.3. Referring to the excerpt fromThe Great Roque: A Biography of Captain John Smith, which of the following is a theory that Paul Lewis has come up with about Pocahontas? Ans: Many people would probably have ignored her if she wasnt a
Christian.Q.4. Which of the following is true of Sam Drownes and Thomas Prestons accounts of March 5, 1770? Ans: They agree the British soldiers shot colonists, but disagree about why they fired.Q.5. What is one reason why Thomas Prestons account might not be reliable? Ans: Preston was in jail and trying to clear his name.Q.6. Based on the
passage, what kind of source does it represent? Ans: primary sourceQ.7. Referring to the excerpt from a letter by jailed Freedom Rider, who is the letters audience? Ans: the authors parentsQ.8. Providing context for an event involves Ans: giving background information about what else was happening at the time.Q.9. The lyric Historians research
more than just the word of one / To learn all sides of history most closely means that Ans: historians use multiple accounts to get the fullest picture of events.Q.10. Which of the following examples illustrates how the past helps us make sense of the present or future? Ans: Carolina researches zoning laws and immigration history, which helps her better
understand why her neighborhood is mostly Puerto Rican. Find the topics below to get exclusive answers: Below you can find the Flocabulary Math Property can be expressed as Ans: A + B = B +
AQ.3. What is another way of writing the following expression? 4+5+2 Ans: (4+5)+2 Ans: distributive Q.5. Which properties could you use to solve the following expression? 4+5+2 Ans: distributive Q.6. The associative
property works with expressions that use Ans: multiplication and addition.Q.7. What is another way of writing the following expression?3(7 + 4) Ans: (3 7) + (3 4)Q.8. The associative property states that you can Ans: group terms using parentheses to add or multiply.Q.9. Which of the following is equal to the expression 6(11 + 3)? Ans: 6 14Q.10. The
commutative property does not apply to which of the following operations? Ans: division and subtraction Below you can find the Flocabulary GCF & LCM quiz answer key for free: Q.1. The GCF of two whole numbers is the Ans: largest whole numbers whole numbers whole numbers are the following operations? Ans: division and subtraction Below you can find the Flocabulary GCF & LCM quiz answer key for free: Q.1. The GCF of two whole numbers is the Ans: largest whole numbers whole numbers whole numbers whole numbers whole numbers whole numbers is the Ans: largest whole numbers who needs to be a new part of the following operations whole numbers who needs to be a new part of the following operations who needs to be a new part of the following operations who needs to be a new part of the following operations who needs to be a new part of the following operations who needs to be a new part of the following operations who needs to be a new part of the following operations who needs to be a new part of the following operations who needs to be a new part of the following operations who needs to be a new part of the following operations who needs to be a new part of the following operations who needs to be a new part of the following operations who needs to be a new part of the following operations who needs to be a new part of the following operations who needs to be a new part of the following operations who needs to be a new part of the following operations who needs to be a new part of the following operations who needs to be a new part of the following operations who needs to be a new part of the following operations who needs to be a new part of the following operations who needs to be a new 
numbers share? Ans: least common multipleQ.3. Least common multipleQ.3. Least common multipleQ.3. Least common factor, reduce the fraction 15/20 to its simplest form Ans: 3/4Q.5. What is the GCF of 12 and 30? Ans: 6Q.6. What is the GCF of 8 and 24? Ans: 8Q.7. Using the greatest common factor, reduce the fraction factor fac
division, addition, subtractionQ.2. If your expression contains square roots, during which step of PEMDAS do you solve them? Ans: exponentsQ.3. True or False: If your expression contains more than one set of parentheses, you should evaluate all of them before doing anything else Ans: TrueQ.4. Which steps of PEMDAS would you need to use to
evaluate the following expression? Ans: parentheses, exponents, multiplication, subtraction of PEMDAS. Ans: False O.7. Evaluate 36-(122) square Ans: expression (20-2, what would you do not need to complete these in the order of PEMDAS. Ans: False O.7. Evaluate 36-(122) square Ans:
0Q.8. Evaluate 2square(459)-3 Ans: 17Q.9. Evaluate 2square(42)-1+(23) Ans: 23Q.10. Evaluate 3square Ans: 20 Below you can find the sum of integers with the same sign? Ans: add their absolute
values and keep the sign of the integers Q.3. Which equation is shown on the number line below? Ans: 4 + (-8) = -4Q.4. To show -1 + (-6) on the number line, which directions would you move? Ans: Subtract 13 10, and keep the negative sign from the -13.Q.6. Find the sum:
the difference: -7 - (-2) = Ans: -5Q.9. Find the difference: 6 - (-9) = Ans: -11Q.10. Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = Ans: -15 Find the difference: 6 - (-9) = A
5 + 12w Ans: wQ.3. Identify the coefficient(s) of the variable in the expression below: 25 6z Ans: 6Q.4. What is 2x + 2 when z = 2? Ans: 2Q.5. What is 2x + 2 when 2x + 
Jasmyn works three hours more than Eve. Which expression represents how many hours Jasmyn works on Saturdays? Ans: e+3Q.10. Hugh incorrect? Ans: because subtraction is not commutative Below you can findthe Flocabulary Equations
quiz answer key for free: Q.1. Which of these is not part of an algebraic equation? Ans: an inequality signQ.2. When you isolate the variable Ans: by itself on one side of the equal sign and a value on the other.Q.3. Use to isolate the variable. Ans: inverse operations Q.4. Which of these is not an equation? Ans: 43(4x +
7y)Q.5. What number does b stand for in this equation? 4x = 27 Ans: 4x = 27 Ans: 4x = 35 Ans: 4x = 36 Ans: 4x = 37 Ans: 4x = 38 Ans: 4x = 3
before multiplication and division.Q.9. What is the first step to solving this equation?-5c + 6 = -4 Ans: Subtract 6 from both sides by 9. Below you can find the Flocabulary Inequalities quiz answer key for free: Q.1. There are _ signs that can be used to mark an
inequality Ans: four Q.2. means Ans: less than or equal to Q.3. What does it mean to isolate the variable in an inequality? Ans: Use inverse operations.Q.5. Which of the following is not an inequality? Ans: 18x + 9yQ.6. If you multiply or divide both
sides of an inequality by a negative number, you must __ the inequality sign Ans: reverseQ.7. Which of the following could be true if x < 45? Ans: x = 44Q.8. Which of the following could be true if y - 75? Ans: y = -75Q.9. How would you graph x > 0 on a number line? Ans: Draw an open circle over 0, and shade the arrow to the right.Q.10. A solution set
always includes Ans: all the numbers that make the inequality true. Click the below button to find both Quiz answer key for free: Q.1. How many outputs are there for each input in a function? Ans: 1Q.2. In the function f(x) = 3x + 2, f(5) =
            Ans: 17Q.3. Which of the following is true? Ans: All functions are relations, but not all relations are functions, but not all relations are function? Ans: 4(1, 5), (2, 6), (4, 5)}Q.5. Which of the following graphs represents a function? Ans: 4(1, 5), (2, 6), (4, 5)}Q.5. Which of the following is not an ordered pair from the function f(x) = 5x 6?
vertical line testQ.10. f(x) = 4x + 3. f(5) = 23. Which number is the input? Ans: 5 Find the topics below to get exclusive answer key for free: Q.1. What does the mean represent in a set of numbers? Ans: the average number Q.2. What does the median represent in a set of
numbers? Ans: the number that represents the middle value in the set of numbersQ.3. What does the mode represent in a set of numbers? Ans: the number that appears most oftenQ.4. True or False: The mean and the average are the same numbers? Ans: the number that appears most oftenQ.4. True or False: The mean and the average are the same numbers Ans: TrueQ.5. If you take 5 quizzes & get scores of 95%, 95%, 80%, 85%, & 75%, how would you find
your mean guiz score? Ans: Add all the scores together & divide by the number of scoresO.6. How do you find the median of the set of numbers in order from lowest to highest first, then find the number in the middle.O.7. What is the mode of 3, 3, 4, 5, 10? Ans: 30.8
What is the median of 0, 1, 2, 6, 6? Ans: 2Q.9. Your basketball team plays 5 games. Your team scored for all 5 games? Ans: 4 points in the first game, 8 points in the first game, 9 points in the first game, 8 points in the first game, 8 points in the first game, 9 points 
people of all different ages: 10, 10, 12, 14, 22, 13, and 24. What is the median age of participants in the play? Ans: 13 Find the topics below to get exclusive answers: Below you can find the Flocabulary Box & Whisker Plots quiz answer key for free: Q.1. The median is the
                                                                                                                                                                                                                                                                                                                                                                                                        of a set of data Ans: middle number Q.2. The smallest number in a data
set is called the Ans: minimumQ.3. In the song, 25 percent of the class weighed less than 6 pounds, 1 ounce at birth. Which of these is correct? Ans: Half the students weighed less than 7 pounds, 5 ounces, and half the
students weighed more.Q.5. In the song, the heaviest baby weighed 10 pounds at birth. 
What is the minimum of the following set of data? Ans: 5.2Q.9. What is the median of the following set of data? Ans: 0.5Q.10. What is the maximum of the following set of data? Ans: 5.2Q.9. What is the maximum of the following set of data? Ans: 1.6 Below you can find the Flocabulary Scatter Plots quiz answer key for free: Q.1. Data with two variables is called Ans: bivariate data.Q.2. True or False: In a scatter plot
both variables are plotted along the x-axis Ans: FalseQ.3. Which of the following best describes an outlier? Ans: A value that is much larger or smaller than most other values.Q.4. True or False an estimate and cannot be calculated Ans: FalseQ.5. Which of the following best describes a negative linear association? Ans: As one
variable decreases, the other increases.Q.6. Which of the following best describes the relationship between the variables shown on this scatter plot? Ans: weak, negative linear associationQ.8. Which of the following best describes the relationship between the variables shown on this scatter plot? Ans: weak, negative linear associationQ.8. Which of the
following best describes the relationship between the variables? Ans: no associationbetween variables? Ans: D Find the topics below
to get exclusive answers: Click the below button to find both Quiz answer key and answers for Read and Respond section: Below you can findthe Flocabulary Percents quiz answer key for free: Q.1. What percent of the grid is shaded? Ans: 60%Q.2. What is 1/4 as a percent? Ans: 25%Q.3. At a clothing store, 15% of the dresses are blue. Which decimal
is equivalent to 15%? Ans: .15Q.4. Choose the value that makes the statement true Ans: 60Q.5. Lakshmi planted 20 begonias, but her neighbors dog ate 7 of them. What percent of the games did they win? Ans: 40%Q.7. Gabrielle took a
Spanish test with 50 questions and answered 44 of them correctly. What percent of the guestions did Gabrielle answer correctly? Ans: 88%Q.8. 60% of a museum? fossils are from the Jurassic Period. If the number of fossils from the Jurassic Period is 15, what is the total number of fossils at the museum? Ans: 25Q.9. In a survey, 75% of respondents
said that they watch TV for one hour each day. If 30 respondents said they watch TV for one hour each day, how many respondents took the survey in total? Ans: 40Q.10. Cam has a collection of ceramic chickens were given to him as gifts, how many chickens
is the sentence of a paragraph Ans: firstQ.4. What do supporting details do? Ans: Prove why the main idea is trueQ.5. Which question would be most helpful when writing a topic sentence? Ans: What is the main thing I want to say about the
topic?Q.7. The topic sentence of a paragraph is Adaptations help animals and plants survive in their environments. Which of these details best supports the topic sentence? Ans: Grasshoppers adapted to be bright green so they could blend in with grass.Q.8. The supporting details of a paragraph include We have lots of energy in the morning, and
Breakfast foodslike eggs, pancakes, and granolaare delicious. Which of these is most likely the topic sentence of the paragraph? Ans: Morning is the best time of day.Q.9. The supporting details of a paragraph include Fossilized footprints help us understand an animals size and weight, and Fossilized teeth can give us hints about an animals diet.
Which of these is most likely the topic sentence of the paragraph? Ans: Fossils help us learn more about animals and plants that lived on Earth many years ago.Q.10. Which of these is in the correct order for writing a paragraph? Ans: Topic sentences, closing sentence Click the below button to find both Quiz answer key and answers
for Read and Respond section: Below you can find the Flocabulary Opinion Writing quiz answer key for free: Q.1. Something thats true for you but not for everyone is called a(n) Ans: opinion.Q.2. True or False: You dont need to use any facts in an opinion piece Ans: FalseQ.3. Read the following sentences: I love a warm cookie and a cold glass of milk.
Chocolate chip cookies melt when theyre warm and are easy to make. What is this introduction missing? Ans: a strong statement of opinion piece is the Ans: opinion you are arguing.Q.6. Which of these adjectives could you use to show an
opinion? Ans: worstQ.7. Lucinda is writing an opinion piece about why horses are the best animals. Which of the following could she use to support her opinion? Ans: all of the aboveQ.8.
                                                                                                                                                                                                                                                                                     are always true Ans: FactsQ.9. Read the following sentence: In conclusion, I think that recycling is the most important thing to do for our planet. What can
the author of this essay do to improve his or her conclusion? Ans: Restate some of the supporting reasons.Q.10. Which of the following is a list of all the things you should do when writing an opinion piece? Ans: State your opinion clearly, support your opinion with facts and reasons, restate your opinion and reasons to conclude. Text Structure Click

less expensive.Q.3. An academic scholarship is an example of Ans: merit-based financial aidQ.4. When do you usually have to begin paying back federal loans? Ans: the principalQ.6. Which of the following is true? Ans: TState schools
usually charge lower tuition for students living in the state.Q.7. Marta wants to go to college, but shes concerned about the cost. Which option would you recommend? Ans: taking out a federal loans and attending a state collegeQ.8. One advantage of federal loans over bank loans is that federal loans Ans: have a fixed interest rate.Q.9. The US
Department of Educations Pell Grant is an example of Ans: need-based financial aidQ.10. The federal government offers subsidized loans to students with
                                                                                                                                                                                                                              Ans: financial need Source We Collected Answers From: FAK Flocabulary is a website that provides educational hip-hop songs, videos, and activities for K-12 online learning. The site was
founded in 2004 by Alex Rappaport in Brooklyn, NY, USA. Flocabularys mission is to teach academic and life skills through hip-hop music. Flocabularys songs and videos are used by schools and organizations across the country to supplement instruction and help students learn. In addition to the educational content, Flocabulary also offers a number
of resources for educators, including lesson plans, classroom activities, and professional development tools. We hope you find all the required Flocabulary Answer Key from above. If it helped make sure you shared it with your friends who might be looking for the same. Hi, Im Thomas, and Ive been a teacher for over 10 years and have taught students
at all levels. I created this blog to really help students get ahead of their exams as well as provide helpful guides on various courses. Correct Answer Explanation The correct answer is integumentary system is responsible for protecting the body from external factors and maintaining homeostasis. It includes the skin, hair, nails, and
glands. Hairs, which are present in the skin, are part of the integumentary system and help to regulate body temperature and provide protection. Explanation The term "skin" does not belong with the others because it is the only term that is not a part of the skeletal system. Joints, cartilage, and bone are all components of the skeletal system, whereas
skin is part of the integumentary system. Explanation The brain, nerves, and spinal cord are all part of the central nervous system, while the skin is not. The brain is responsible for processing information and controlling body functions, the nerves transmit signals between the brain and the rest of the body, and the spinal cord serves as a pathway for
these signals. On the other hand, the skin is the largest organ of the body and its main function is to protect the body from external factors. Therefore, the skin is part of the integumentary system. This system includes the
skin, hair, nails, and various glands. The integumentary system serves as a protective barrier for the body, regulating body temperature, and preventing water loss. It also plays a role in sensory perception, as it contains receptors for touch, pressure, pain, and temperature. The skin is the largest organ of the body and is essential for overall health
and well-being. Correct Answer Explanation The nervous system is responsible for generating electrical impulses, that run the muscular system. It consists of the brain, spinal cord, and nerves, which send signals to the muscular system. It consists of the brain, spinal cord, and nerves, which send signals to the muscular system.
muscles throughout the body. The nervous system also plays a role in regulating muscle tone and reflexes. Correct Answer Explanation The pancreas belongs to the digestive system because it plays a crucial role in the digestive system because it plays a crucial role in the digestion of food. It produces enzymes that help break down carbohydrates, proteins, and fats in the small intestine. Additionally, the
pancreas produces insulin and glucagon, hormones that regulate blood sugar levels. These functions are essential for proper digestion and nutrient absorption in the same way that hair, skin, and nails are. While hair, skin, and nails are all made up of cells
and tissues, the eyes are sensory organs that allow us to see. They contain various structures such as the cornea, iris, and retina, which work together to process visual information. Therefore, the eyes stand out as a distinct category compared to the other options provided. Correct Answer Explanation The blood vessels are responsible for carrying
blood, sugar, and oxygen to different parts of the body. This indicates their role in the transportation of essential substances, which is a function of the cardiovascular system. The cardiovascular system consists of the heart, blood vessels, and blood, working together to circulate blood throughout the body. Therefore, the blood vessels belong to the
cardiovascular system. Correct Answer Explanation The urinary system is responsible for filtering the blood and eliminating wastes in liquid form. It consists of the kidneys, which filter the blood and produce urine, the ureters, which transport the urinary system is responsible for filtering the blood and eliminates the urine.
from the body. This system plays a crucial role in maintaining the body's fluid balance, regulating blood pressure, and removing metabolic waste products from the bloodstream. Correct Answer Explanation The liver belongs to the digestive system because it plays a crucial role in the process of digestion. It produces bile, which helps in the
breakdown and absorption of fats. The liver also detoxifies harmful substances and stores nutrients such as vitamins and minerals. Additionally, it produces proteins that are essential for blood clotting and immune function. Therefore, the liver's functions are closely associated with the digestive system. Correct Answer Explanation The tonsils belong
to the lymphatic system. The lymphatic system is responsible for maintaining fluid balance, filtering out harmful substances, and producing immune cells. The tonsils are a part of the lymphatic system and play a role in trapping and removing bacteria and other pathogens that enter the body through the mouth and nose. They help in defending the
body against infections and are considered as a part of the body's immune response. Correct Answer Explanation The lymphatic system collects waste materials, toxins, and excess fluid from the body tissues and transports them to the lymphatic system plays a crucial role in the
immune response by producing and transporting white blood cells, which help fight against invading pathogens and infections. Therefore, the lymphatic system is responsible for both collecting "trash" from the body and assisting in the defense against pathogens. Correct Answer Explanation The gall bladder is an organ that is a part of the digestive
system. It plays a role in the digestion and absorption of fats by storing and releasing bile, which helps break down fats in the small intestine. Therefore, the correct answer is digestive. Correct Answer Explanation The cartilage that connects bones together belongs to the skeletal system. Cartilage is a type of connective tissue that provides support
and flexibility to the skeletal system. It acts as a cushion between bones, allowing for smooth movement and reducing friction. The skeletal system is responsible for providing structure, support, and protection to the body, and cartilage plays a crucial role in maintaining the integrity of this system. Correct Answer Explanation The glands of the body
are under the control of the endocrine system. This system is responsible for producing and secreting hormones that regulate various bodily functions. Glands such as the pituitary gland, thyroid gland, and adrenal glands are all part of the endocrine system and play a crucial role in maintaining homeostasis and coordinating the activities of different
organs and tissues in the body. The endocrine system works in conjunction with the nervous system to ensure proper communication and control throughout the body. Correct Answer Explanation The eyes belong to the nervous system because they are responsible for receiving visual information and transmitting it to the brain for processing. The
nervous system is responsible for coordinating and controlling the body's activities, including sensory perception. The eyes contain specialized cells called photoreceptors that detect light and convert it into electrical signals, which are then transmitted through the optic nerve to the brain. This allows us to see and interpret our surroundings. Correct
Answer Explanation The term "kidneys" does not fit with the others because it is the only organ mentioned in the list. The other terms, "esophagus," "anus," and "mouth," are all parts of the digestive system. Correct Answer Explanation The term "ureters" does not fit with the others because it is the
only term related to the urinary system, while the other terms are related to the endocrine system. The thymus, pancreas, and pituitary gland are all glands that produce hormones, while the ureters are tubes that transport urine from the kidneys to the bladder. Correct Answer Explanation The spleen belongs to the lymphatic system. The lymphatic
system is a network of vessels, organs, and tissues that help to remove toxins, waste, and other unwanted materials from the blood, removing old or damaged red blood cells, and producing white blood cells. It also helps to store and release immune cells, such as
lymphocytes, which are important for fighting infections and diseases. Therefore, the correct answer is lymphatic.
